VELOCITY

US

Velocity was born with the partnership of both iHomesGroup and Systems AV. Both entities covering a global reach with offices in the UK, Ireland, USA and Caribbean.

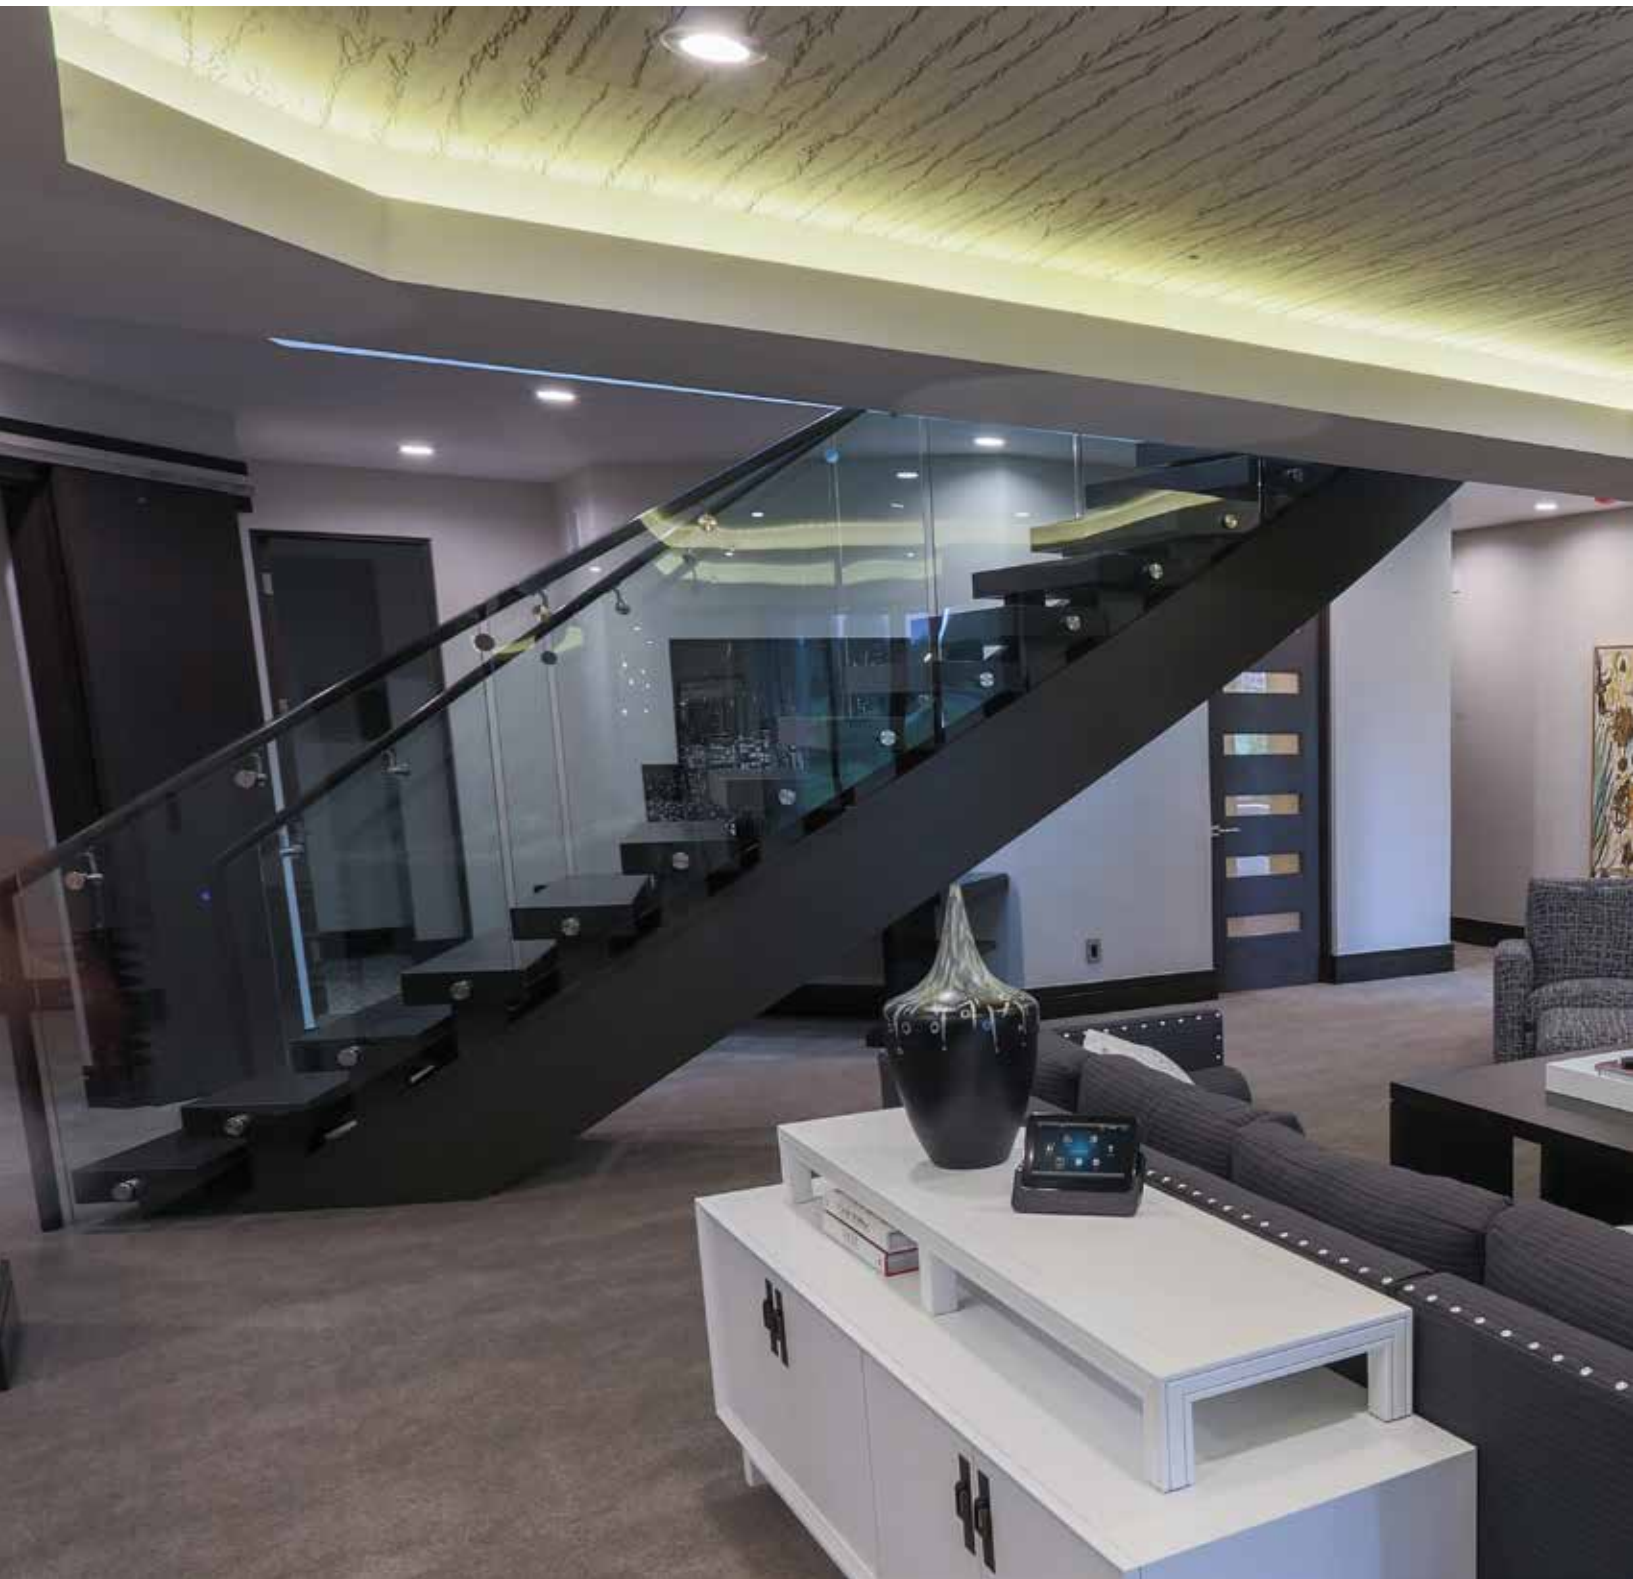

We employ over 20 highly qualified people with a diverse skill set ranging from Audio, Video, IPTV, Video Conferencing, Network Design / Implementation, Control Systems, Hospitality Systems, MDU's, Access Control and Lighting Control.

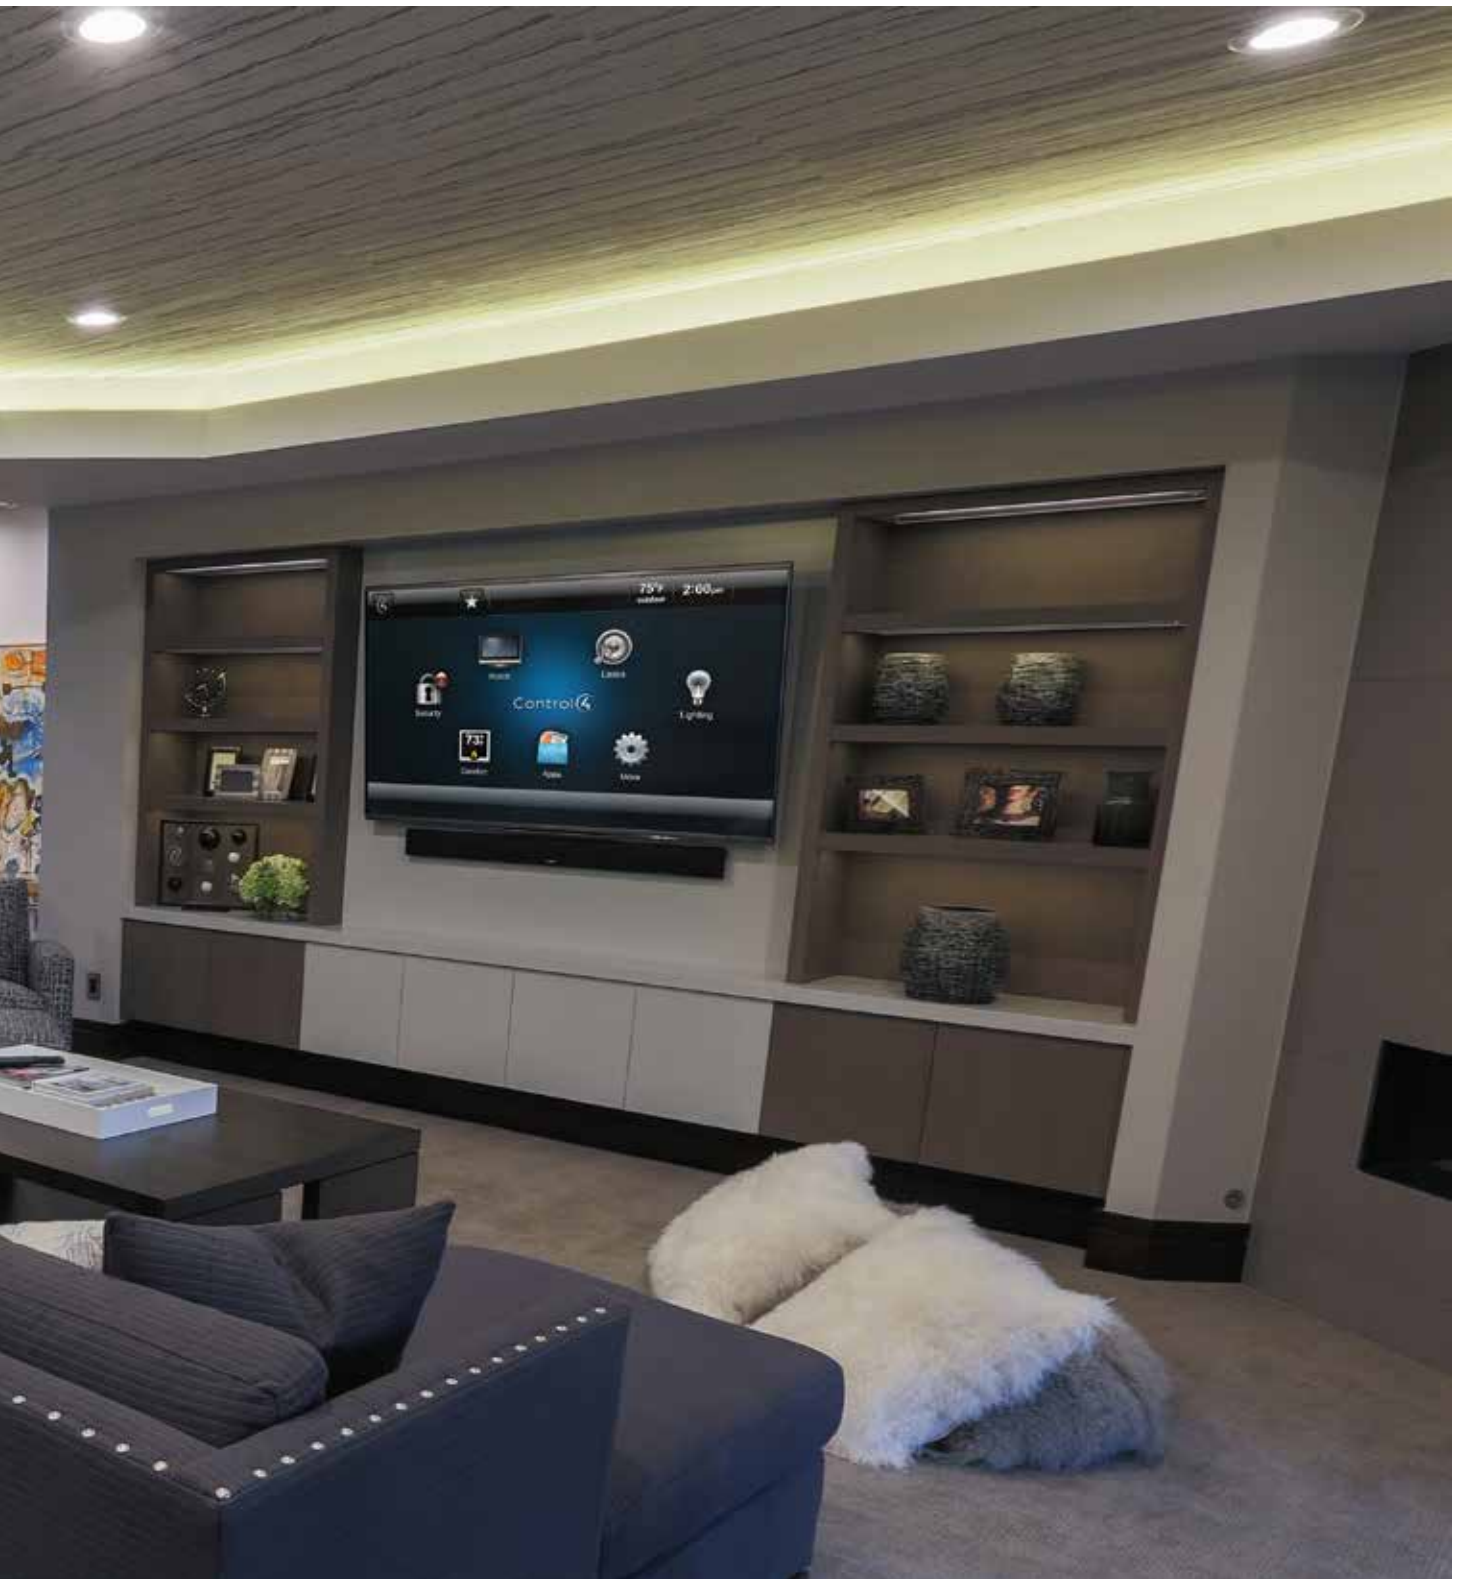

We have over 50 Years combined experience in these sectors and would be recognised as one of the leading companies / integrators in the industry

Home Automation

Environment controls are the basis of our room technologies, giving the hotelier/management company the ability to take control of lighting, HVAC, blinds, televisions and guest services from Property Management Systems or Cloud Based Systems.

Providing a wealth of benefits from energy efficiency and cost reduction to improved maintenance and minimal room down time.

Control Interfaces

The identity is key when making your interface choice. We provide a wide range of interface choices depending on that identity, from sleek touch screens and desk phones to traditional rocker switches.

Keypads & Switches

Control4 configurable keypads provide a stunning interface for any Control4 Smart Home combining flexible button configurations with beautiful colours and finishes.

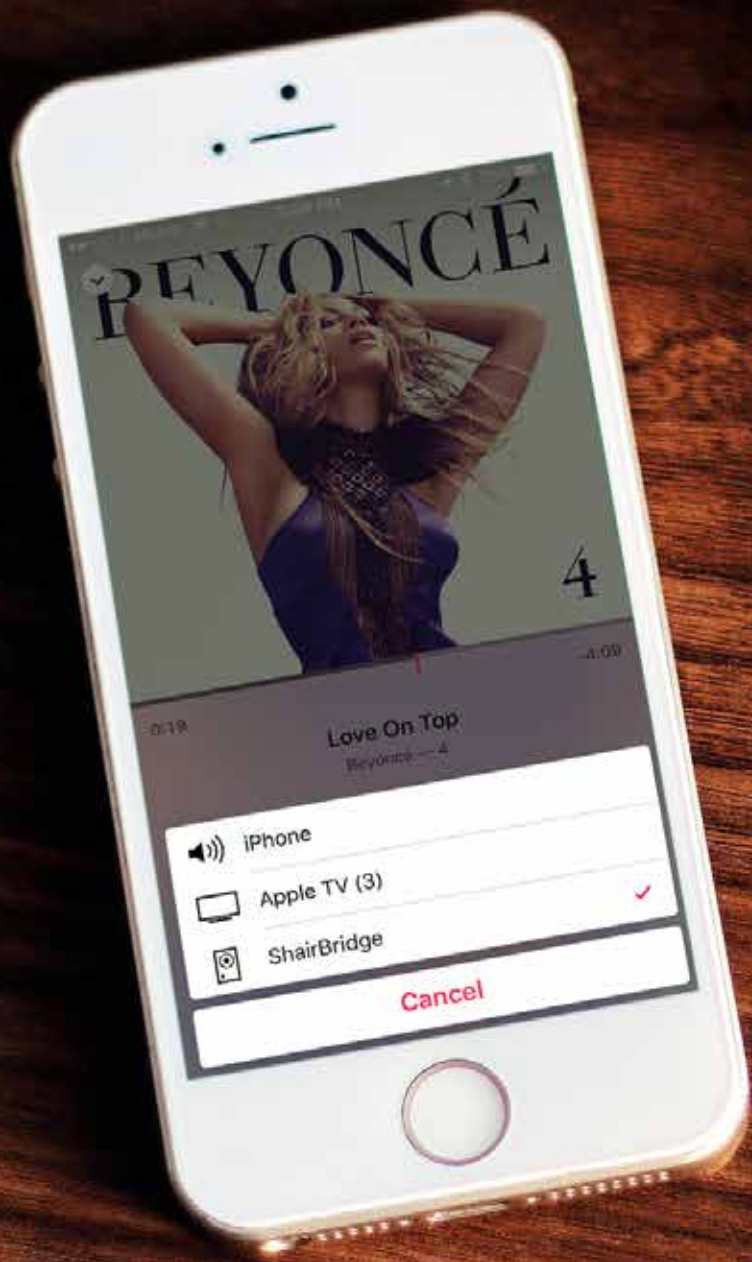

All keypads are customisable, backlit with engraved buttons for quick, simple control. There are 38 possible configurations to choose from for any purpose.

Control4 User Interfaces

A range of dedicated touch interfaces in different sizes allows the hotelier to include a vast set of features in a single interface.

From the dedicated touch panel guests can access all environment controls as well as guest services, book cabanas and make reservations.

Multi-Room High Resolution Audio Solutions

With more audio solutions than ever, you can play directly from your computers, iPads of your own music or stream from the web from Tidal, Napster or Deezer, opening your home up to a million song choices.

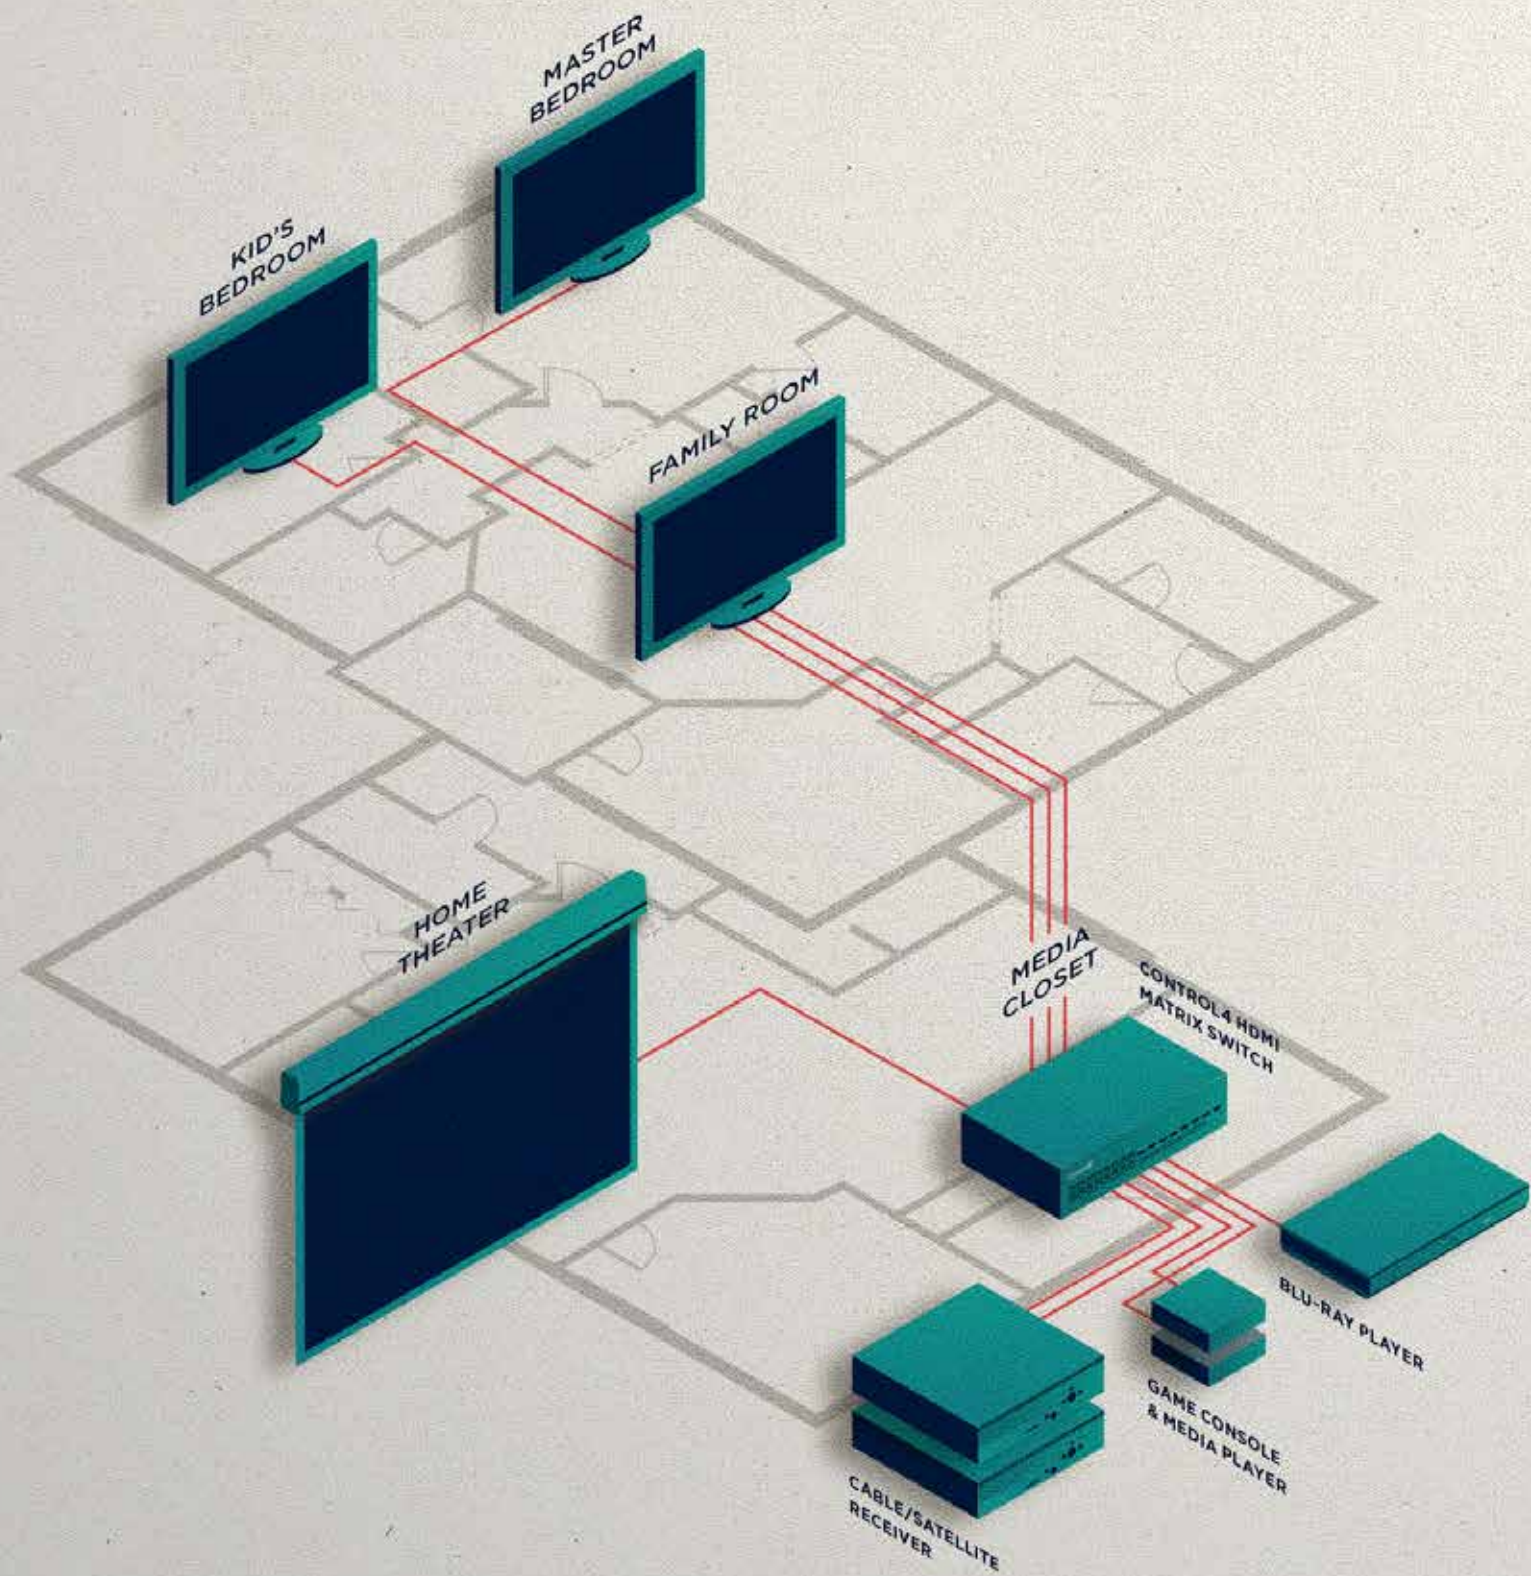

High-resolution audio as standard, filling the house with clear 24-bit streams, controlled from stunning interfaces, whether that's touchpanels, on screen displays or mobile devices.

Distribute and switch between music sources in each room or group together for parties.

In-ceiling speakers provide you with a discreet immersive audio experience across the home, keeping the speaker out of sight.

Enjoy the convenience of keeping your audio in one catalogue with an easy access and amazing sound everytime.

How do I control these devices?

Multi-Room 4K Resolution Video Distribution

Distribute video throughout the house so that you can enjoy beautiful, 4K high-definition content in every room without adding clunky gear and wiring behind each TV.

With multi-room video, everyone can enjoy the same movie or watch what they want, wherever they want.

Share your entire movie library, streaming video, Sky, Games Consoles and DVD's throughout the home—no need for hardware and multiple video sources in every room.

Consolidate all of your audio and video equipment into central cupboard, creating a clutter-free installation, while delivering superior sound, stunning 4K high-definition video and an incredible experience in every room.

Lighting Systems

Lighting is one of the key influencers in the ambiance of a home and the feel of a room.

With smart lighting you completely change the ambiance of the room, or whole house with a single touch, transforming a relaxing dim lighting level into bright welcoming party lighting - all from a touch.

Maximise the benefits of smart lighting by integrating with other parts of your smart home system. Combining with morning and evening scenes, blinds and curtains will automatically lower or rise.

Whether the home a new build or retrofit we have lighting solutions to suit, transforming traditional lighting systems into fully functional 21st century integrated lighting systems.

Home Cinema

Rival any cinema with your very own dedicated home cinema, incorporating the best in surround sound technologies and high definition video with a customised lighting experience to go with it.

- Watch content from any of your sources around the home or add a dedicated cinema grade media player.
- Keep the cinema clutter free by keeping all your equipment in a central location or hiding away into cupboards.
- Incorporate smart lighting for the ultimate home cinema experience
 - Choose your movie
 - Screen drops from the ceiling
 - Lighting dims completely
 - Thermostat adjusts
 - Movie Starts
 - **All from one touch**
